

Flight Case Adhesive Solutions

Complete solutions for the flight case industry's high demand for bond longevity & high heat resistance. InnoV8® from Intact provides reliability, easy processing and competitive gluing compared to other adhesive chemistries like solvents, water based and polyurethanes.

- High adhesion to difficult surfaces
- Easy to apply-open times to suit line speeds
- High heat resistance
- Low density formulations for increased process efficiency
- No harmful chemicals

Intact bonds to a wide variety of substrates including polyurethane and polyethylene foams, metals, plywood and plastics including polypropylene, astroboard and polyurea coated board.

We have solutions for foam and wood bonding, cnc routed foam inserts and all types of custom-made cases.

Free testing on your products in our lab - no need to stop your production line.
