

## Foaming Adhesive Solutions

**Complete solutions for foaming adhesive to increase adhesive mileage, reduce the weight and consumption of adhesive by up to 65% to improve performance and reduce costs.**

- High bond strength
- Increased open time
- Faster set time
- Volumetric increase
- Reduced adhesive consumption
- Reduced sagging or running
- No harmful chemicals
- Heat dissipates quicker - prevents thermal distortion of substrates

**Intact** foaming adhesives bond to a wide variety of substrates including PIR, rigid/flexible foams, wood, metals, acoustic materials, plastics including polypropylene/polyethylene as well as paper/cardboard and glass fiber.

We have solutions for insulation products, roofing products, automotive & industrial air filters, batteries, gasketing, automotive sound dampening, plastic mouldings, cardboard pallets, medical containers, foam and mattress bonding.

Free testing on your products in our lab - no need to stop your production line.
