

Insulation Panel Adhesive Solutions

Complete solutions for the insulation industry's high demand for bond longevity & high heat resistance. InnoV8® from Intact provides reliability, easy processing and competitive gluing compared to other adhesive chemistries like water or solvent based adhesives or polyurethanes.

- High adhesion to difficult surfaces
- Easy to apply-open times to suit line speeds
- High heat resistance
- Low density formulations for increased process efficiency
- No harmful chemicals
- Can be foamed to reduce material costs and increase volume

Intact bonds to a wide variety of substrates including PIR, rigid foams, wood, metals, plastics acoustic materials, kraft, EPS, phenolic foam and glass.

We have solutions for encapsulation of fibreglass insulation with plastic film, plasterboard lamination, pipe wrap, phenolic cavity board, roof and floor insulation and flat panel lamination.

Free testing on your products in our lab - no need to stop your production line.
