

## Nonwoven & Medical Adhesive Solutions

**Complete solutions for the manufacturing of disposable hygiene and medical products such as personal hygiene, infant care, gowns & drapes and mattress protector pads. InnoV8® from Intact offers a low-cost adhesive technology combined with manufacturing efficiency.**

- Low density for high yield
- Excellent thermal stability
- Excellent adhesion to PP/PE
- High peel values
- Low odour

Our range of low density hotmelts that outperform conventional hotmelts (0.9gr/cc) resulting in higher mileage. Excellent spray properties and excellent thermal stability enables high line speeds and efficient processing.

We have solutions for assembly, core, elastic, positioning and specialist applications such as hospital supplies and adhesive wound dressings. These adhesives have a balance of good cohesive strength, high initial and aged peel values.

Free testing on your products in our lab - no need to stop your production line.
