

Pharmaceutical Packaging Adhesive Solutions

Bio-Based
formulations
available

Complete solutions for the pharmaceutical industries high demand for safe, non-toxic adhesive tamper-proof bonding and sealing. Starting in 2019, all prescription medicines must have a tamper evidence feature to comply with EU Directive 2011/62/EU.

- High adhesion to difficult surfaces
- Easy to apply-open times to suit line speeds
- Wide temperature resistance
- Low density formulations for increased process efficiency
- No harmful chemicals

Intact bonds to a wide variety of coated & recycled cardboard, paper, plastics and foils. We have solutions for hotmelt, PUR hotmelt and cold glue combinations, together with our machine partners we can offer complete solutions to tamper-proof sealing.

Free testing on your products in our lab - no need to stop your production line.

Keep production going®
