

Heavy Duty Corrugated & Transit Packaging Adhesive Solutions

Bio-Based
formulations
available

Complete solutions for the manufacturing of double or triple wall corrugated board and foam packaging. Our adhesives are designed to withstand the physical requirements and temperature extremes needed for rigorous supply chain demands whether by road or air. InnoV8[®] from Intact provides reliability, easy processing and competitive gluing compared to other adhesive chemistries like water or solvent based adhesives and other hotmelts.

- High adhesion to foam, plastics, polystyrene, and wood
- Easy to apply-open times to suit line speeds
- Wide temperature resistance
- Low density formulations for increased process efficiency
- No harmful chemicals
- Can be foamed to reduce material costs and increase volume

Intact bonds to a wide variety of substrates including polyurethane and polyethylene foams as well as anti-static materials, cardboard, wood and plastics. We have solutions for fabrication of foam based protective packaging, heavy duty corrugated, cardboard pallets and export packing cases.

Free testing on your products in our lab - no need to stop your production line.

Keep production going[®]
